Project Title: Ethereum Blockchain

I'd like to build this site as multiple pages with a normal navigation bar at the top of the page (side navigation bar for mobile). The wiki page has plenty of content to build out the webpage and I will be sourcing images from various sites. The purpose of this site is to introduce everyone to Ethereum and address the importance of decentralized applications.

Site structure:

- **Home**
 - Ethereum overview
 - Explain how it is related to Ether
- **History**
 - Creator thoughts on name
 - Creators
 - Milestones
- **Ether**
 - About
 - Purpose
 - Comparison to bitcoin
- **Projects built on blockchain**
- **Get involved**
 - Explain how someone can get involved
 - Tools needed to build on platform
- **Sources**
