Project Title: Napoleon Hill Website

I'd like to build this site as multiple pages with a normal navigation bar at the top of the page (side navigation bar for mobile). The wiki page has plenty of content to build out the webpage and I will be sourcing images from various sites. The purpose of this site is to introduce everyone to Napoleon by outlining his background and legacy left.

Site structure:
- **Home**
  - Landing image of Napoleon with basic personal information
  - Brief overview of background and impact made on society
- **Career**
  - Childhood
  - Career, including failed business ventures
- **Books written**
  - Images of all books with modal descriptions
- **Philosophy of Achievement**
  - Highlights Napoleon philosophy of achievement outlined in his famous books
- **Shop**
  - Show merchandise available by Napoleon
- **Sources**
